PROFESSIONAL SUMMARY

Aspiring Data Analyst with a B.Tech in Computer Science & Information Technology (CGPA 8.75/10) and hands-on experience in Python (Pandas, NumPy), SQL, Power BI, and Excel. Built and deployed multiple end-to-end NLP and data visualization projects, including dashboards, classification models, and EDA pipelines. Completed an industry internship in NLP focused on text preprocessing, feature extraction, and sentiment analysis. Seeking an entry-level Data Analyst role to apply analytical, visualization, and statistical skills to solve real business problems.

TECHNICAL SKILLS

- **Programming & Querying:** Python, SQL
- **Data Analysis Libraries:** Pandas, NumPy, Matplotlib
- **Visualization & BI Tools:** Power BI, Excel, Streamlit
- **Other Tools:** Jupyter Notebook, Git/GitHub
- **Core Competencies:** Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing, Data Visualization, Dashboard Development, Statistical Analysis, NLP & Sentiment Analysis

PROJECTS

Sentiment Analysis Dashboard — Python, Pandas, NLP, Power BI / Streamlit

- Built an NLP-based sentiment classification model and integrated outputs into an interactive dashboard, enabling visualization of sentiment trends across 14,460 tweets achieving 76% accuracy.

SMS Spam Classifier — Python, Scikit-learn, NLP

- Implemented a Naive Bayes classification model with an optimized text-preprocessing pipeline (tokenization, stop-word removal, TF-IDF), achieving 96% accuracy on a dataset of ~5,572 messages.

Auto Tag Generator — Python, NLP, Feature Extraction

- Developed an NLP-based system for automatic tag generation using text preprocessing and keyword/feature extraction, improving content categorization across a sample set of 85085 documents.

Autocorrect Application — Python, NLP, Language Modeling

- Built a Python-based autocorrect tool that detects and corrects spelling errors in real time using edit-distance algorithms and language modeling, tested on a vocabulary of 32198 words.

Pose-Based Signature Authentication System — Python, OpenCV, Computer Vision

- Developed a biometric authentication system using pose-detection techniques to verify user identity via signature gestures, achieving 89% accuracy across 30 samples.

WORK EXPERIENCE

NLP Intern — Internshala

[Oct 2022] – [June 2026]

- Completed a hands-on internship in Natural Language Processing, gaining practical experience in text preprocessing, feature extraction, and sentiment analysis.

EDUCATION

B.Tech, Computer Science & Information Technology — Mahatma Jyotiba Phule Rohilkhand University, Bareilly, UP

2022 – 2026

- CGPA: 8.75 / 10

CBSE Class XII (PCM with Physical Education) — Bishop Conrad School, Bareilly, UP

2021 – 2022

- Percentage: 90%

CBSE Class X — Bishop Conrad School, Bareilly, UP

2019 – 2020

- Percentage: 91%

CERTIFICATIONS & ACHIEVEMENTS

- Data Science for Engineers — NPTEL (8-week course), scored 75%
- Introduction to Generative AI — Simplilearn
- Natural Language Processing Internship Certificate — Internshala
